

## Update HOERBIGER-ORIGA CAD-catalogue „CADENAS Version 8“

The data update of the already installed software „PARTdataManager 8.0.24“ happens in the following way:

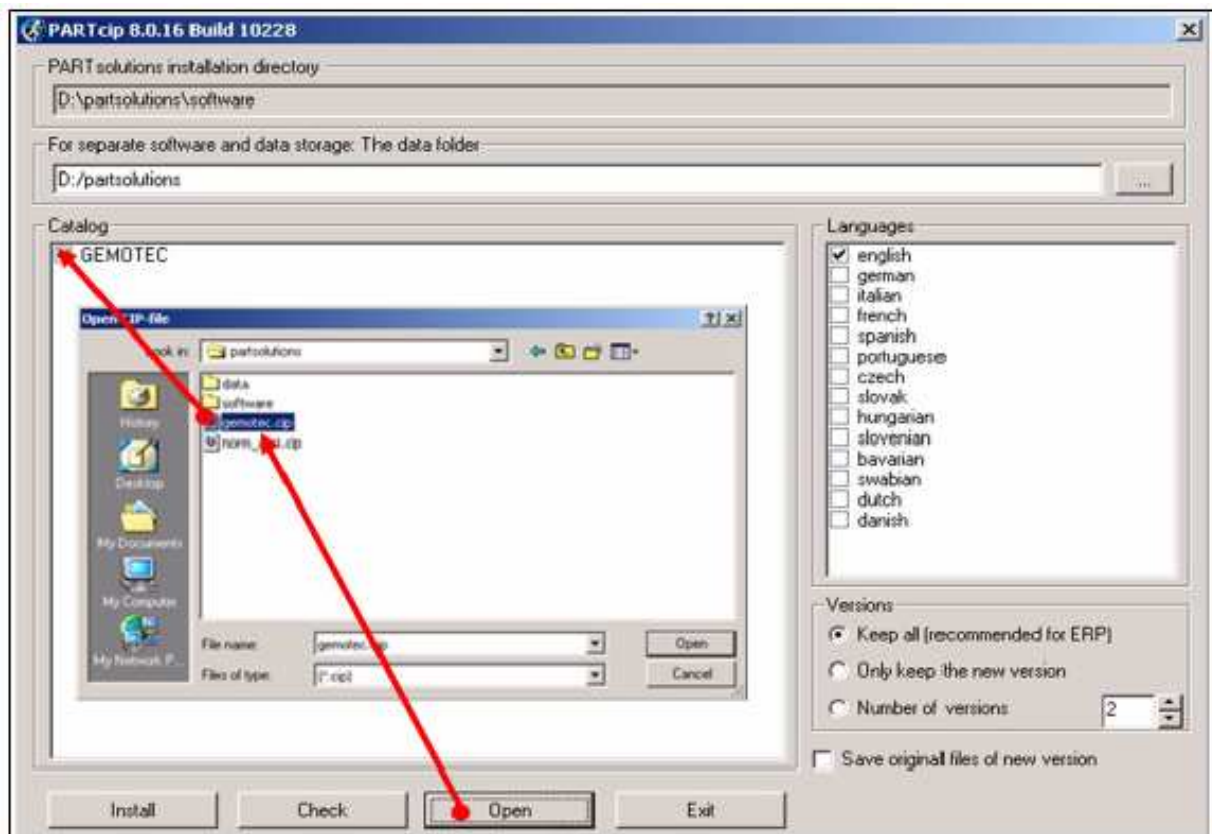

1. Download from [www.hoerbiger-origa.com](http://www.hoerbiger-origa.com) of following files:  
Catalogue data: hoerbiger\_origa.cip, size 22,8MB  
Classification data: eclass50.cip, size 7MB
2. Requirement: Installation of CD-ROM 2005:
  - Start CD-ROM „Hoerbiger-Origa intelligent automation 2005“ (Autostart).
  - Select installation routine: CD1 „Installation of the 2D/3D CAD catalogue“.
  - Select language (german – english – french – italian – spanish).
  - Finish installation routine. Files on CD-ROM are dated 22. Feb. 2005
3. Start CADENAS version 8 with:  
Start/Programs/Hoerbiger-Origa/Hoerbiger-Origa Automation 2005,  
or with automatically installed desktop link.

-> Program start of „PARTdataManager 8.0.24“

4. Menu Extras:

**PARTcip:** Starts a compressed catalogue file

To select a catalogue:

1. click the **Open** button and
2. double-click the **cip file** of the desired catalogues: hoerbiger\_origa.cip and eclass50.cip
3. The catalogue is displayed in the **Catalogue** field.
4. Select the **Languages** for the catalogue installation.
5. In the **Versions** field: Select one of the options described below.
6. Click the **Install** button.

**Versions** field:

- **Keep all (recommended for ERP):** Installs the update version, but retains the installed version in the system. (The version already installed, is named, e.g., V1.)
- **Only keep the new version:** Installs the update version and removes existing versions.
- **Number of versions:** If you have already installed update versions (V1, V2, etc.), you can define here how many you wish to retain upon this update. With "2" for example, the new version is installed, and the next most recently installed version retained.
