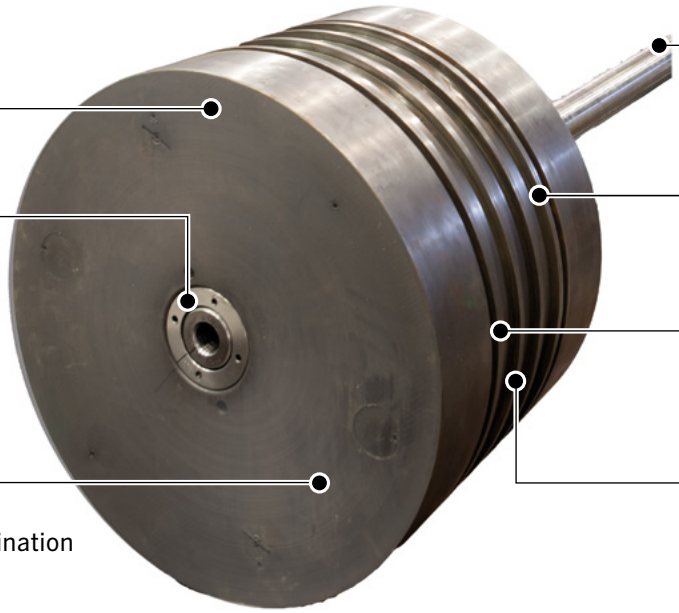
Piston and Rod Repair

Improve your compressor’s performance and reliability

HOERBIGER

Piston assembly repair

Our experts will thoroughly evaluate your piston and rod assembly, handling the reconditioning and repair process to ensure it is ready for trouble-free reinstallation in your compressor. Simply send the detached piston assembly to us, and get it back ready to reinstall.



Scope	Our USPs
Disassembly and cleaning	Correct equipment to protect the piston and rod during disassembly and assembly
Visual inspection and dimension check	Understanding of the necessary specifications to accurately define repair scope
Non-destructive testing	NDT certifications provided
Reconditioning and repair	Globally defined and refined procedures to proven best practices
Final inspection	Detailed repair report (and coating summary if applicable) provided
Assembly	Dedicated fixtures for correct work holding and extensive calibrated torquing and tensioning tools
Packaging	Corrosion protection for long term storage

Locally close to the customers – globally successful: HOERBIGER is active worldwide in 43 countries on all continents. 6,174 employees at 133 locations – including 30 production plants – deliver reliable solutions for better performance, increased safety, and fewer emissions. In 2023, they generated sales of 1.416 billion euros. For renowned customers from the energy sector, the process industry, the automotive industry, the mechanical engineering industry, safety technology, and the electronics industry, performance-determining products and services from HOERBIGER make the difference. With innovations for decarbonization and energy transition, HOERBIGER is already enabling change today for a better tomorrow. As majority shareholder, the HOERBIGER Foundation preserves the 129-year-old entrepreneurial heritage and guarantees stability, independence, and a future-oriented strategy.
